

FORRESTVILLE VALLEY SCHOOL DISTRICT #221

October 15, 2024

Dear Forrestville Valley Families,

I am happy to announce that Ogle County Health Department will be coming to Forreton Grade School and Forreton Junior Senior High School to offer our students flu vaccinations onsite Wednesday, October 23rd. Flu vaccinations are approved for anyone 6 months and older and are completely voluntary. If you are interested in having your student receive the flu vaccination at school, please complete the attached flu vaccination form and include a copy of your insurance card. All completed consents are due to school by Friday, October 18th. If your insurance does not cover flu vaccinations and you wish to pay out of pocket, the cost of the vaccination is \$35.00 and checks can be payable to Ogle County Health Department.

Please note the following:

If your student is allergic to eggs, Ogle County Health Department does not have an alternate vaccine option so your student would not be eligible to participate in this vaccination clinic.

Students who are uncooperative at time of administration will not receive the flu shot. You will be notified if Ogle County Health Department is unable to vaccinate your child so that alternate arrangements can be made.

If you have any questions, please email me at jnelson@fvdistrict221.org or call me at your student's school office.

Thank you,

Jennifer Nelson RN
